Surabaya, Indonesia

Summary

Informatics Engineering student at Institut Teknologi Sepuluh Nopember with a strong foundation in Python, SQL, data analysis, and machine learning. Experienced in database instruction, data management, and team leadership, with a focus on applying analytical and technical skills to solve real-world problems and deliver meaningful insights.

Education

Institut Teknologi Sepuluh Nopember — Aug 2024 – Aug 2028 (Expected)
Bachelor of Informatics, GPA 3.49/4.00 — *Surabaya, Indonesia*

SMA Negeri 1 Srengat — Jul 2021 – May 2024
Senior High School, 87.60/100.00 — *Blitar, Indonesia*

Work Experience

Teaching Assistant for Database Systems — Aug 2025 – Dec 2025
Institut Teknologi Sepuluh Nopember — *Surabaya, Indonesia*

- Guided 13 students through hands-on database design and SQL exercises.
- Explained CDM/PDM, DDL, and DML concepts through practical demonstrations.
- Developed SQL case studies to support applied query-solving practice.
- Evaluated assignments and quizzes across 7 sessions to assess student understanding.

Programming Division Intern — Sep 2024 – Oct 2024
ITS Robocon — *Surabaya, Indonesia*

- Explored microcontroller systems and their robotics applications.
- Practiced embedded programming using C++ and Python.
- Studied ROS fundamentals for robot navigation and control.
- Learned basic robotics programming workflows during the internship program.

Projects

Autonomous Web QA Agent | *Laravel, Node.js, Playwright, LLM* — 2026

- Built an autonomous web QA agent using Laravel 13, Livewire 4, Node.js, and Playwright, integrating an OpenAI-compatible LLM with snapshot-based action validation.
- Designed a six-gate repair verification pipeline using isolated Docker sandboxes to validate regression failures, patched test success, and browser replays.
- Integrated GitHub Apps authentication and REST APIs to inspect repositories, commit bounded patches to restricted branches, and create idempotent draft PRs.
- Implemented application security controls for SSRF prevention, DNS rebinding mitigation, same-origin enforcement, and credential redaction.

Agentic AI for BPMN Code Change Planning | *Python, Multi-Agent, RAG* — 2026

- Developed a collaborative multi-agent architecture featuring specialized roles (analyst, backend, frontend, CSS, reviewer) to orchestrate codebase modifications from BPMN updates.
- Integrated Retrieval-Augmented Generation (RAG) to dynamically fetch and leverage relevant implementation examples from an existing ERP codebase.
- Designed and executed comparative experiments across three setups (single-agent, single-agent with RAG, and multi-agent with RAG) to measure performance variations.
- Evaluated the impact of role decomposition and contextual retrieval in improving the accuracy and structural logic of automated architectural planning.

Handwritten Chinese Numeral Classification | *Python, TensorFlow, ResNet-18* — 2026

- Developed an end-to-end handwritten Chinese numeral classification pipeline using TensorFlow/Keras for 15 classes and 10,500 images from 70 writers.
- Engineered reproducible image preprocessing, disk caching, and custom data augmentation to address handwriting variations.
- Implemented a custom ResNet-18 model with EMA, AdamW, learning-rate scheduling, label smoothing, and mixed-precision training.
- Built a leakage-free evaluation pipeline using writer-grouped cross-validation, multi-seed ensembling, test-time augmentation, and Grad-CAM diagnostics.

Organizational & Committee Experience

External Affairs Staff Mar 2026 – Present
Himpunan Mahasiswa Teknik Computer-Informatika ITS *Surabaya, Indonesia*

- Led the *Siapin Karirmu* Instagram content program as Person in Charge.
- Coordinated 60 participants as Liaison Officer during Oracle and Telkom company visits.
- Led the planning and execution of the Benchmarking program.
- Managed program coordination and task delegation within the organizing team.

Vice Head of Data Management Mar 2026 – Present
Schematics 2026 *Surabaya, Indonesia*

- Designed SOPs for website-based and offline registration data management.
- Automated SQL query generation using spreadsheets for registration data processing.
- Built Looker Studio dashboards to track participant registrations.
- Automated bulk messaging and email distribution for participant communications.

Head of Food & Nutrition Aug 2025 – Mar 2026
Ramadan di Kampus 1447H *Surabaya, Indonesia*

- Led 25+ staff and coordinated cross-division operations.
- Designed food distribution systems serving 700+ participants daily.
- Coordinated with 15+ vendors on procurement, pricing, and MoU agreements.
- Established SOPs for food quality control, vendor selection, and distribution logistics.

Skills

Languages:	Python, SQL, Go, C++, PHP (Laravel), Node.js
Data Science & AI:	TensorFlow/Keras, LLMs, Multi-Agent AI, RAG, CNN (ResNet), Cross-Validation
Data & Tools:	Playwright, Docker, Looker Studio, DBeaver, TablePlus, Git/GitHub, Figma
Other:	Business Process Modeling (BPMN), Application Security, Database Design (CDM/PDM)
